Defrosting is performed automatically. The water from the defrosting process runs out via the drain opening and is evaporated.

To ensure the appliance remains energy efficient, we recommend defrosting it at regular intervals or if there is a large buildup of ice. The main factors causing ice to form inside your appliance are its location (e.g. high humidity), the settings on the appliance and user behavior.

Manual defrosting:

- ▶ Switch off appliance. (see 5.3.2 Switching appliance on and off)
- ▶ Disconnect power plug.
- ▶ Store refrigerated items elsewhere.
- ▶ Leave the appliance door open during defrosting process.
- ▶ Soak up remaining defrost water with a cloth, clean the drain opening and the appliance.
